Kris,

I've attached the DERs for 49158917 and 49158918.

Thanks,
Holly

Subject: Thiamethoxam Residue Studies: MRIDs 49158915-49158919

Hi Chris and Kris,

In preparation for the forthcoming EFED residue database for bee-relevant matrices, Keith and Nick Mastrota have done a few searches in OPPIN to generate a list of residue studies for which we might consider entering the residue data into the database. Five of the studies that were found in OPPIN are for thiamethoxam, and they're not studies we had previously looked at for similar efforts with the PRTF. Two of the studies were included in the neonic residue bridging analysis, but the other three were not included in that analysis.

Deliberative Process / Ex. 5

Deliberative Process / Ex. 5

No rush on getting this information! And please feel free to forward to anyone that I may have missed on this email chain.

Keith, did I miss anything or do you have any other context to add?

Thanks,
Holly
